

Object Views Drawing Project Goals:

- 1.) Bring a 3D object from home to use as a subject for this drawing. (for ideas refer to appropriate ideas for drawings handout)
- 2.) Draw a min. of 3 different views of your object for this assignment. (birds-eye, worms-eye, and a side or choice view)
- 3.) Creatively figure out how to incorporate all of your space within your picture plane balancing all of the different views to create a creative yet unified piece.
- 4.) Demonstrate the use of value with color or pencil in the final drawing as a means of describing the object portrayed.

*Keep in mind all of the elements of art, how can you use some or all of these: line, shape, value, color, texture, space, form.
